

## National Pesticide Residue Control Plan

### (according to Art. 30.2 of Reg. (EC) No 396/2005)

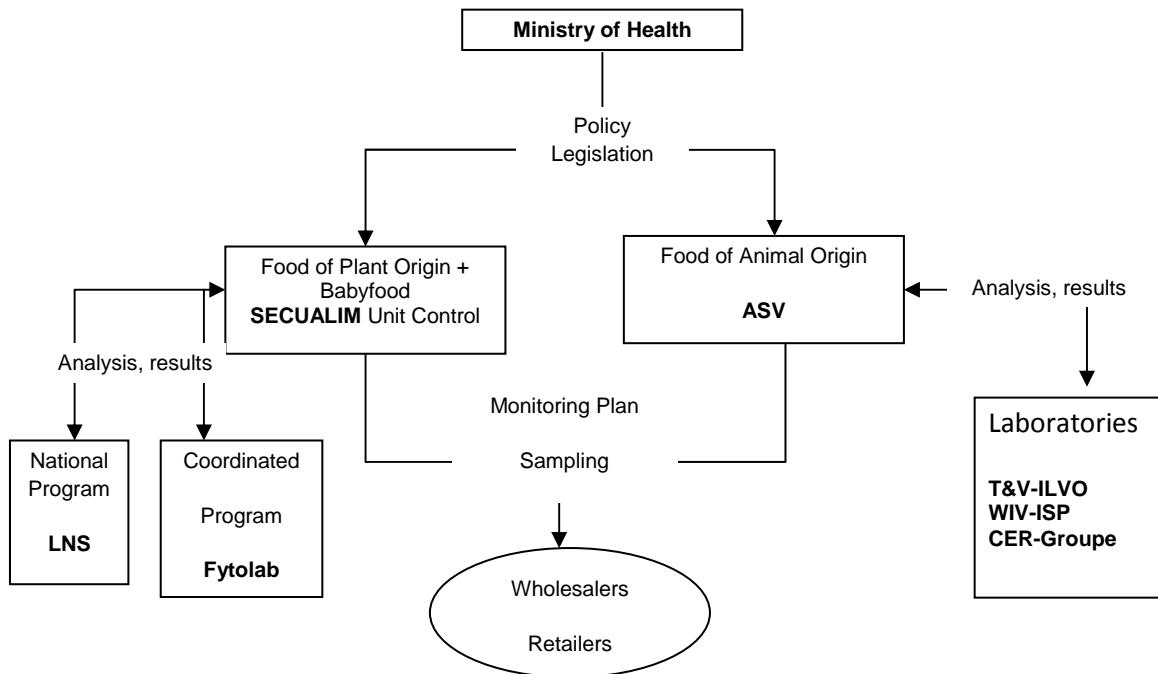

Country: LUXEMBORUG

Year: 2011-2013

#### Part 1: Infrastructure of services involved in the implementation of the pesticide residue control plan

Role	Organisation name	Organisation Address	Products
Official Reporting Organisation Residue programme design Sample Collection Enforcement agencies	Food Safety Service	9 avenue Victor Hugo L-1750 Luxembourg	Food, Fruit, vegetables, cereals, baby food
Official Reporting Organisation Residue programme design Sample Collection Enforcement agencies	Veterinary Service Administration	211 route d'Esch L-1014 Luxembourg	Animal Product
Laboratory services	FYTOLAB	Technologiepark 2-3 B-9052 Zwijnaarde GENT	Food, Fruit, vegetables, cereals, baby food
Laboratory services	Laboratoire National de Santé	1A rue Auguste Lumière L-1950 Luxembourg	Food, Fruit, vegetables
Laboratory services	T&V-ILVO	Brusselsesteenweg 370, B-9090 MELLE	Animal Product
Laboratory services	WIV-ISP	Rue J. Wytsmanstraat, 14 B-1050 Brussel	Animal Product
Laboratory services	CER-Groupe	Rue du Point du Jour, 8 B-6900 Marloie	Animal Product

The Ministry of Health is the competent Authority for the control of the pesticide residues in food of plant and animal origin, including baby food and cereals. The Food Safety Service of the Direction for Public Health under the Ministry of Health is the executive competent Authority for the control of the pesticide residues in food of plant origin, including baby food and is responsible for the operation of notifications the Rapid Alert System via the national contact point (OSQCA) for the same categories of food. The Veterinary Service Administration under the Ministry of Health is the executive competent Authority for the control of the pesticide residues in food of animal origin.

*Secualim: Food safety service of the Direction of public health*

*ASV: Veterinary Service Administration*

*LNS: National health laboratory*

## Part 2: Design of monitoring plan

### Food of plant origin, cereals, baby food

The annual control program for food of plant origin and for baby food is drafted by the Food safety service of the Direction for public health. It provides for sampling for the control of presence of pesticides residues in fruit, vegetables, cereals and baby food.

The choice of food products to be sampled and the pesticides to be analyzed is based on a risk analysis, in particular taking into account results from previous checks, toxicological data of residues and food consumption figures.

The EU coordinated program is the main part of the control program.

Sampling is carried out mainly at wholesalers but also at retail level. Samples collected by inspectors of the Food Safety Service arrive at the National health laboratory of Luxembourg

- The samples for the coordinated community control are sent to a specific laboratory in Belgium (Fytolab). (Since 2009).
- The samples for the national annual program are analyzed by the national health laboratory of Luxembourg.

All results for food of plant origin are reported to the Food safety service.

Service de la sécurité alimentaire	7-9 avenue Victor Hugo L-1750 Luxembourg	(352) 2477 5625 (352) 2479 5655
Plan pluri annuel intégré partiel Pesticides	FC/PH	Luxembourg

**Food of animal origin:**

The annual control program for food of animal origin is drafted by the veterinary Services Administration (ASV).

The monitoring is in compliance with directive (CE) N° 96/23 and decision (CE) N° 97/747.

The number of samples per matrix to be analyzed is defined by these regulations.

All results are transmitted to the DG SANCO unit 5 through a special database application "Residues – Monitoring plan and result" available on the Internet.

**Part 3: History**

All results for control campaigns of pesticides residues can be checked on the site:  
<http://www.securite-alimentaire.public.lu/organisme/pcnp/rpt/rpt9/index.html>

**Part 4 multiannual national control programmes for pesticides residues 2011-2013**

The updated multiannual national control programmes for pesticides residues for Luxembourg can be viewed on the site:

[http://www.securite-alimentaire.public.lu/organisme/pcnp/sc/cs9\\_prod\\_phyto/ppp\\_residus\\_pesticides/index.html](http://www.securite-alimentaire.public.lu/organisme/pcnp/sc/cs9_prod_phyto/ppp_residus_pesticides/index.html)

**Details**

		2011	2012	2013
	Food (Number of samples)	Code for pesticides	Food	Food
Coordinated Community Program (Fytolab)	Beans with pod (15)	LMS+GMS+dithiocarbamates	Aubergines	Apples
	carrots(15)	LMS+GMS	bananas	head cabbage
	cucumbers(15)	LMS+GMS+dithiocarbamates	cauliflower	leek
	oranges or mandarins(15)	LMS+GMS	table grapes	lettuce
	pears(15)	LMS+GMS+Amitraze+Chlormequat+Mepiquat	orange juice	tomatoes
	potatoes(15)	LMS+GMS	peas	peaches
	spinach(15)	LMS+GMS+Bromide iron	peppers	rye or oats
	rice(15)	LMS+GMS4+bromide iron	) wheat	strawberries
	Wheat Flour (15)	LMS+GMS4+Chlormequat, Mepiquat+Glyphosate	olive oil	wine grapes
	Baby food (10)	LMS+GMS4+LMS2+ dithiocarbamates+ Chlormequat+Mepiquat	Baby Food	Baby Food
	Eggs			

National Program (LNS)	Wine Grapes (15)	LMS+GMS+LMS5+ Captane+ Folpet+dithiocarbamates + Chlormaquat+Mepiquat	Wine Grapes	
	Different fruits and vegetables (90)	LNS	Different fruits and vegetables	

#### Part 5: Analytical Methods and Quality Assurance

The application of the regulatory pesticide residue definition was problematic for the following substances:

Residue definition	Code EFSA
Ethofumesate (sum of ethofumesate and the metabolite 2,3-dihydro-3,3-dimethyl-2-oxo-benzofuran-5-yl methane sulphonate expressed as ethofumesate)	RF-0163-001-PPP
Fenchlorphos (sum of fenchlorphos and fenchlorphos oxon expressed as fenchlorphos)	RF-0178-001-PPP
Cyhalofop-butyl (sum of cyhalofop butyl and its free acids)	RF-0109-001-PPP
Diuron (Diuron including all components containing 3,4- dichloraniline moiety expressed as 3,4-dichloraniline)	RF-0152-001-PPP
Flonicamid (sum of flonicamid, TNFG and TNFA)	RF-0194-001-PPP
Flufenacet (sum of all compounds containing the N fluorophenyl-N-isopropyl moiety expressed as flufenacet equivalent)	RF-0203-001-PPP
Mepanipyrim (Mepanipyrim and its metabolite (2-anilino-4-(2-hydroxypropyl)-6-methylpyrimidine) expressed as mepanipyrim)	RF-0274-001-PPP
Prochloraz (sum of prochloraz and its metabolites containing the 2,4,6-Trichlorophenol moiety expressed as prochloraz)	RF-0349-001-PPP
Propachlor oxalinic derivate of propachlor, expressed as propachlor	RF-0353-001-PPP
Spirotetramat and its 4 metabolites BYI08330-enol, BYI08330-ketohydroxy, BYI08330-monohydroxy, and BYI08330 enol-glucoside, expressed as spirotetramat	RF-0396-001-PPP
Triflumizole Triflumizole and metabolite FM-6-1(N-(4-chloro-2-trifluoromethylphenyl)-n-propoxyacetamide), expressed as Triflumizole	RF-0440-001-PPP
Bromoxynil (bromoxynil including its esters expressed as bromoxynil)	RF-0053-001-PPP
Ioxynil, including its esters expressed as ioxynil	RF-0253-001-PPP

## Part 6: Scope of Analytical methods

### Coding GMS

Tecnazene	0,05	N			

**Part 4: Actions in response to non-complaint results**

In case of a non compliant sample, an assessment of the risk to the consumer is performed and the appropriate measures such as recall and RASFF notification are taken. The ASTA (Technical services of agricultural sector responsible for primary production) is informed of all non compliant results on national production.
