2021 Euphresco research topics

EFSA would like to share with you the [Euphresco network](#)'s 2021 research topics for transnational collaboration. The feedback has been very positive as an unprecedented number of expressions of interest has been collected in a short time; there is still the **possibility to join one or more of the topics**, whether interested.

For more information, do not hesitate to visit the link:

https://www.euphresco.net/funding/current_calls or liaise with Dr. Baldissera Giovani - Euphresco coordinator at EPPO (bgiovani@euphresco.net)

More information on the attached documents.

Training

Transparency Regulation Implementation Training Programme and upcoming MetaPath webinar | Deadline: 19/04/2021

Webinar: MetaPath – how to complete DER composers for pesticides mammalian toxicology metabolism studies

The training session will be held online on **20 April 2021 14:00 – 18:00 (CET)**.
The registration will close on **19 April 2021 - 12:00 (CEST)**

Might you need any clarifications, please do not hesitate to contact webinars@efsa.europa.eu.

All EFSA trainings on new processes and supporting tools can be found on this EFSA [webpage](#).

Other

EXTENSION OF DEADLINE: FOR DISSEMINATION - SURVEY on diet-related chronic diseases considered in national Food Based Dietary Guidelines (FBDGs) | Deadline: 09/04/2021

The European Food Safety Authority (EFSA) has been requested by the European Commission to provide **scientific advice for the development of harmonised mandatory front-of-pack nutrition labelling and the setting of nutrient profiles for restricting nutrition and health claims on foods** (please find the request published online on the following [link](#)).

In particular, EFSA is requested to provide scientific advice on the following:

- Nutrients of public health importance for European populations, including non-nutrient components of food (e.g. energy, dietary fibre)
- Food groups which have important roles in diets of European populations and subgroups thereof
- Choice of nutrients and other non-nutrient components of food for nutrient profiling

In relation to this mandate, EFSA is seeking information on diet-related chronic diseases that have been considered by EU Member States in setting national Food Based Dietary Guidelines (FBDG).

EFSA is contacting **the national competent bodies in the EU Member States in charge of setting national FBDGs**, who could provide the requested information by answering to the survey.

Please note that the outcome of the survey is published. No personal data will be published.

You are kindly invited to access the questionnaire for the survey by clicking [HERE](#).

We are pleased to inform you that the deadline for EU Member States to provide scientific advice has been extended until **Friday 9 April 2021**.
